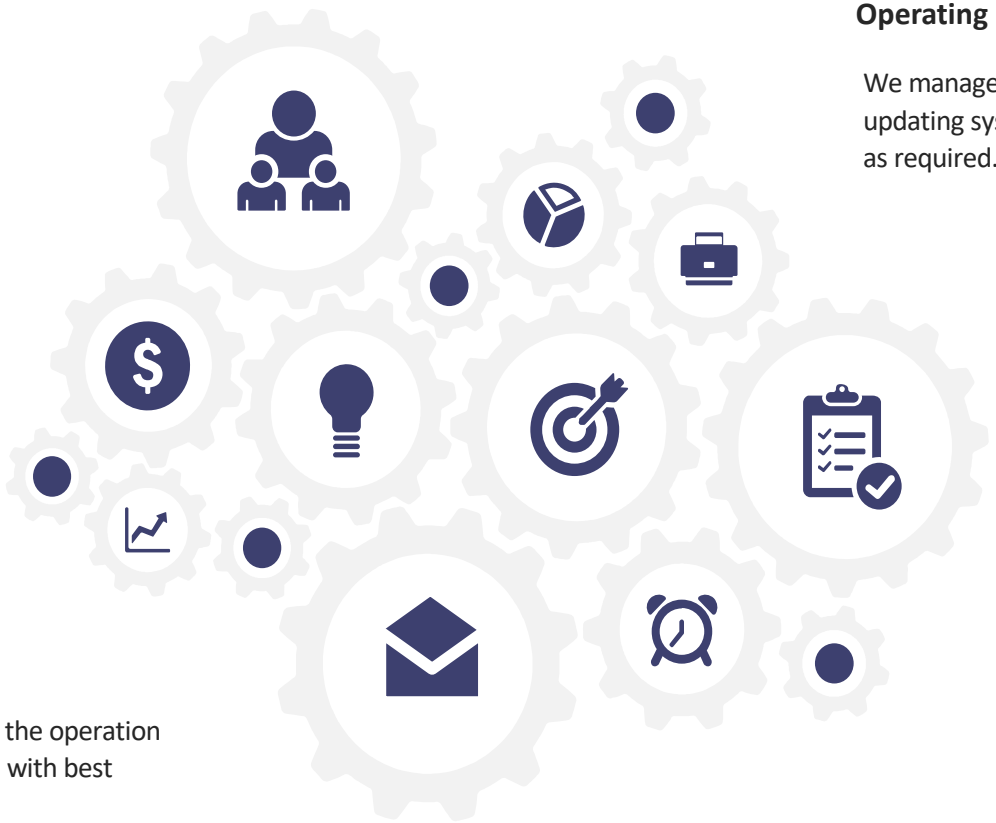
Services

Bhr

Foundational IT Services

Run And Manage Business Applications

Bhr manages your account, costs and basic operation, ensuring you a service provided with the least effort and cost. In this service, we operate, monitor and monitor changes in business needs and ensure that the application is compatible with your needs.



Operating Cloud Platforms And Hosting

We manage all the work of operating cloud platforms, updating systems and servers, and ensuring that they work as required.

Preparing The Infra For Services

Reserve, manage and operate the domain, while monitoring the operation of various systems and services.

Run IT Operations

Support, assistance and guidance regarding the operation of IT business and operations in accordance with best professional practices and methodologies.

Software Development Services

Implementing ERP Systems

Implement, Adjust And Launch The System

Analyzing requirements, designing workflows, adjusting settings, and working with internal teams to train, prepare the system, and actually launch it into production environments.

Design And Customize Modifications

By the nature of all systems, the system cannot be completely identical to all the details of companies and special procedures. Therefore, we provide you with exceptional expertise to design, build and provide customizations.

Counseling Sessions

You have a need for a technical opinion from specialists in the fields of business technology and development. Bhr's team offers you the ability to coordinate consulting sessions in any technical field.

Professional Services

Technical Consulting

Our team is qualified with professional certificates in best practices and approved methodologies.

Project Management and Implementation

Management and implementation of projects in the following areas:

1. Networks And Communications
2. Internet Of Things, Office Systems And Security
3. Platforms For Participatory Action And Communication
